## Nothing Found

09/129,308 11/22/2004

Your search for "&%" did not return any results.

You may want to try an [Advanced Search](#) for additional options.

Please review the [Quick Tips](#) below or for more information see the [Search Tips](#).

### Quick Tips

- Enter your search terms in lower case with a space between the terms.

sales offices

You can also enter a full question or concept in plain language.

Where are the sales offices?

- Capitalize proper nouns to search for specific people, places, or products.

John Colter, Netscape Navigator

- Enclose a phrase in double quotes to search for that exact phrase.

"museum of natural history" "museum of modern art"

- Narrow your searches by using a + if a search term must appear on a page.

museum +art

- Exclude pages by using a - if a search term must not appear on a page.

museum -Paris

Combine these techniques to create a specific search query. The better your description of the information you want, the more relevant your results will be.

museum +"natural history" dinosaur -Chicago

Cerise Wuthrich, Gail Kalbfleisch, Terry Griffin, Nelson Passos

April 2003 **Journal of Computing Sciences in Colleges**, Volume 18 Issue 4Full text available: [pdf\(73.85 KB\)](#) Additional Information: [full citation](#), [abstract](#), [references](#), [index terms](#)

Wireless access to the Internet has opened the door to a new range of computer applications, designed to satisfy the requirement of the mobile user, equipped with a personal digital assistant or cell phone device. In the educational field, the mobile communication environment allows students to access registrar records, enter enrollment information, obtain grades, etc. This paper describes the use of mobile devices in helping students prepare for knowledge tests and required concepts, followed b ...

Amir Herzberg

May 2003 **Communications of the ACM**, Volume 46 Issue 5Full text available: [pdf\(152.82 KB\)](#) Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index terms](#), [review](#)

Mobile devices enable secure, convenient authorization of e-banking, retail payment, brokerage, and other types of transactions.

**3 Function-based object model towards website adaptation**

Jinlin Chen, Baoyao Zhou, Jin Shi, Hongjiang Zhang, Qiu Fengwu

April 2001 **Proceedings of the tenth international conference on World Wide Web**Full text available: [pdf\(615.57 KB\)](#) Additional Information: [full citation](#), [references](#), [citations](#), [index terms](#)

**Keywords:** HTML/WML conversion, content adaptation, content function, website understanding

**4 Characteristics of WAP traffic**

Irene C. Y. Ma, James Irvine

January 2004 **Wireless Networks**, Volume 10 Issue 1Full text available: [pdf\(328.62 KB\)](#) Additional Information: [full citation](#), [abstract](#), [references](#), [index terms](#)

This paper considers the characteristics of Wireless Application Protocol (WAP) traffic. We start by constructing a WAP traffic model by analysing the behaviour of users accessing public WAP sites via a monitoring system. A wide range of different traffic scenarios were considered, but most of these scenarios resolve to one of two basic types. The paper then

uses this traffic model to consider the effects of large quantities of WAP traffic on the core network. One traffic characteristic which is ...

**Keywords:** WAP, mobile data, self-similarity, traffic modelling

##### 5 Quiet calls: talking silently on mobile phones

Les Nelson, Sara Bly, Tomas Sokoler

March 2001 **Proceedings of the SIGCHI conference on Human factors in computing systems**

Full text available:  [pdf\(492.32 KB\)](#)

Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index terms](#), [review](#)

Quiet Calls is a technology allowing mobile telephone users to respond to telephone conversations without talking aloud. QC-Hold, a Quiet Calls prototype, combines three buttons for responding to calls with a PDA/mobile phone unit to silently send pre-recorded audio directly into the phone. This permits a mixed-mode communication where callers in public settings use a quiet means of communication, and other callers experience a voice telephone call. An evaluation of QC-Hold shows that it is ...

**Keywords:** computer mediated communication, hand-held devices, interaction design, mobile computing, telecommunication

##### 6 Satchel: providing access to any document, any time, anywhere

Mik Lamming, Marge Eldridge, Mike Flynn, Chris Jones, David Pendlebury

September 2000 **ACM Transactions on Computer-Human Interaction (TOCHI)**, Volume 7 Issue 3

Full text available:  [pdf\(591.29 KB\)](#)

Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index terms](#)

Current solutions for providing access to electronic documents while away from the office do not meet the special needs of mobile document workers. We describe "Satchel," a system that is designed specifically to support the distinctive features of mobile document work. Satchel is designed to meet the following five high-level design goals (1) easy access to document services; (2) timely document access; (3) streamlined user interface; (4) ubiquity; and (5) compliance with security ...

**Keywords:** document access, document appliance, document processing, information appliance, mobile computing, mobile work

##### 7 The Satchel system architecture: mobile access to documents and services

Mike Flynn, David Pendlebury, Chris Jones, Marge Eldridge, Mik Lamming

December 2000 **Mobile Networks and Applications**, Volume 5 Issue 4

Full text available:  [pdf\(207.51 KB\)](#)

Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index terms](#)

Mobile professionals require access to documents and document-related services, such as printing, wherever they may be. They may also wish to give documents to colleagues electronically, as easily as with paper, face-to-face, and with similar security characteristics. The Satchel system provides such capabilities in the form of a mobile browser, implemented on a device that professional people would be likely to carry anyway, such as a pager or mobile phone. Printing may be per ...

##### 8 WEST: a Web browser for small terminals

Staffan Björk, Lars Erik Holmquist, Johan Redström, Ivan Bretan, Rolf Danielsson, Jussi Karlgren, Kristofer Franzén

November 1999 **Proceedings of the 12th annual ACM symposium on User interface software and technology**

Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index](#)

Full text available: [pdf\(173.07 KB\)](#)[terms](#)

We describe WEST, a WEB browser for Small Terminals, that aims to solve some of the problems associated with accessing web pages on hand-held devices. Through a novel combination of text reduction and focus+context visualization, users can access web pages from a very limited display environment, since the system will provide an overview of the contents of a web page even when it is too large to be displayed in its entirety. To make maximum use of the limited resources available on a typica ...

**Keywords:** WAP (wireless application protocol), flip zooming, focus+context visualization, hand-held devices, proxy systems, text reduction, web browser

## 9 QOS provisioning: Assessing the user-perceived quality of packet voice in networks with mobile users

Cristina Hristea Seibert, Fouad A. Tobagi

September 2003 **Proceedings of the 6th ACM international workshop on Modeling analysis and simulation of wireless and mobile systems**

Full text available: [pdf\(124.95 KB\)](#) Additional Information: [full citation](#), [abstract](#), [references](#), [index terms](#)

As the Internet becomes the medium of choice for transporting integrated data, voice and video traffic, it is crucial that the quality of service approaches the level seen in networks traditionally employed for carrying these various traffic types. For example, the quality of voice communication in the Internet should approach the toll-quality levels experienced in the public switched telephone network (PSTN). Mobile wireless users have become a common sight across the world, and have motivated ...

**Keywords:** mobility, packet voice, tracking, user-perceived quality

## 10 Mobile computing: beyond laptops

Laura Cappelletti

October 1997 **Proceedings of the 15th annual international conference on Computer documentation**

Full text available: [pdf\(406.32 KB\)](#) Additional Information: [full citation](#), [index terms](#)

## 11 Experience with adaptive mobile applications in Odyssey

B. D. Noble, M. Satyanarayanan

December 1999 **Mobile Networks and Applications**, Volume 4 Issue 4

Full text available: [pdf\(144.16 KB\)](#) Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index terms](#)

In this paper, we present our experience with application-aware adaptation in the context of Odyssey, a platform for mobile data access. We describe three applications that we have modified to run on Odyssey — a video player, a Web browser, and a speech recognition system. Our experience indicates that it is relatively simple to incorporate applications into Odyssey, and that application source code is not always essential. Although our applications w ...

## 12 Oxymoron, a non-distance knowledge sharing tool for social science students and researchers

Camille Bierens de Haan, Gilles Chabré, Francis Lapique, Gil Regev, Alain Wegmann

November 1999 **Proceedings of the international ACM SIGGROUP conference on Supporting group work**

Full text available: [pdf\(1.02 MB\)](#) Additional Information: [full citation](#), [abstract](#), [references](#), [index terms](#)

Oxymoron is a World Wide Web based knowledge capitalization and sharing tool that was conceived and developed by a multidisciplinary team, comprised of adult education and distributed systems professionals from France and Switzerland. Oxymoron's aim is to

support and facilitate the work of students and researchers in social science by providing them with a system where they can contribute and obtain knowledge about the relevant readings in their fields of interest.

**Keywords:** WWW, bibliography, groupware, knowledge management, methodology of research, organizational learning; reading cards, social sciences

### 13 Short talks: virtual collaboration tools: ChatScape: a visual informal communication tool in communities

Yuji Ayatsuka, Nobuyuki Matsushita, Jun Rekimoto

March 2001 **CHI '01 extended abstracts on Human factors in computing systems**

Full text available:  [pdf\(243.57 KB\)](#)

Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index terms](#)

Informal communication in a community is as important as formal meetings. We propose to support on-line informal communication by a visual communication tool, named *ChatScape*. A message on ChatScape is made of short text and still images. Short text messages are suitable for informal communication, and snapshots of users adds presence and hints of contexts.

**Keywords:** chat, informal communication, still image, visual key

### 14 WebExpress: a client/intercept based system for optimizing Web browsing in a wireless environment

Barron C. Housel, George Samaras, David B. Lindquist

December 1998 **Mobile Networks and Applications**, Volume 3 Issue 4

Full text available:  [pdf\(338.35 KB\)](#)

Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index terms](#)

This paper describes an application model and software technology that makes it possible to run World Wide Web applications in wide area wireless networks. Web technology in conjunction with today's mobile devices (e.g., laptops, notebooks, personal digital assistants) and the emerging wireless technologies (e.g., digital cellular, packet radio, CDPD) offer the potential for unprecedented access to data and applications by mobile workers. Yet, the limited bandwidth, high latency, high cost, ...

### 15 I Think, therefore IM: When conventions collide: the tensions of instant messaging attributed

Amy Volda, Wendy C. Newstetter, Elizabeth D. Mynatt

April 2002 **Proceedings of the SIGCHI conference on Human factors in computing systems: Changing our world, changing ourselves**

Full text available:  [pdf\(360.81 KB\)](#)

Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index terms](#)

We discuss findings from observation, interviews, and textual analysis of instant messaging use in a university research lab setting. We propose a method for characterizing the tensions that permeate instant messaging texts and that expose the collision between conventions of verbal and written communication. Given this method, we suggest a design space for exploring potential design choices in instant messaging clients. Finally, we recommend an analysis of communicative conventions as a fruitful ...

**Keywords:** computer-mediated communication, computer-supported cooperative work, instant messaging, interaction design, sociolinguistics

### 16 Interactions with shared displays: Toward universal mobile interaction for shared displays

Tim Paek, Maneesh Agrawala, Sumit Basu, Steve Drucker, Trausti Kristjansson, Ron Logan,

Kentaro Toyama, Andy Wilson

November 2004 **Proceedings of the 2004 ACM conference on Computer supported cooperative work**Full text available: [pdf\(304.99 KB\)](#) Additional Information: [full citation](#), [abstract](#), [references](#), [index terms](#)

Researchers have noted conflicting trends in collaboration technologies between delivering more information on larger displays and exploiting mobility on smaller devices. Large, shared displays provide greater choice in the presentation of information, but mobile devices offer greater flexibility in the access of information. We describe a platform that leverages the best of both worlds by allowing multiple users to access and interact with a large, shared display using their own personal mobile devices.

**Keywords:** mobile devices, platform, shared displays

## 17 Optimizing encoding: Using link analysis to improve layout on mobile devices

Xinyi Yin, Wee Sun Lee

May 2004 **Proceedings of the 13th international conference on World Wide Web**Full text available: [pdf\(377.81 KB\)](#) Additional Information: [full citation](#), [abstract](#), [references](#), [index terms](#)

Delivering web pages to mobile phones or personal digital assistants has become possible with the latest wireless technology. However, mobile devices have very small screen sizes and memory capacities. Converting web pages for delivery to a mobile device is an exciting new problem. In this paper, we propose to use a ranking algorithm similar to Google's PageRank algorithm to rank the content objects within a web page. This allows the extraction of only important parts of web pages for delivery to mobile devices.

**Keywords:** html, link analysis, pda (personal digital assistant), www (world wide web)

## 18 Short paper session: Parallel adaptive mobile web clipping

Alexander Vrenios

September 2003 **Proceedings of the 6th ACM international workshop on Modeling analysis and simulation of wireless and mobile systems**Full text available: [pdf\(167.45 KB\)](#) Additional Information: [full citation](#), [abstract](#), [references](#), [index terms](#)

We describe a unique approach to improving the performance of a Web clipping portal by exploiting inherent parallelism in the syntax of widely used markup languages, and by employing a parallel computing platform as an in-line proxy between the handheld mobile device and a Web server on the Internet.

**Keywords:** mobile internet access, parallel processing, web clipping

## 19 Ubiquitous computing for firefighters: field studies and prototypes of large displays for incident command

Xiaodong Jiang, Jason I. Hong, Leila A. Takayama, James A. Landay

April 2004 **Proceedings of the 2004 conference on Human factors in computing systems**Full text available: [pdf\(976.87 KB\)](#) Additional Information: [full citation](#), [abstract](#), [references](#), [index terms](#)

In this paper, we demonstrate how field studies, interviews, and low-fidelity prototypes can be used to inform the design of ubiquitous computing systems for firefighters. We describe the artifacts and processes used by firefighters to assess, plan, and communicate during emergency situations, showing how accountability affects these decisions, how their current Incident Command System supports these tasks, and some drawbacks of existing solutions. These factors informed the design of a large el ...

**Keywords:** emergency response, field study, firefighter, low-fidelity prototypes, ubiquitous computing

**20 Robust MPEG video watermarking technologies**

Jana Dittmann, Mark Stabenau, Ralf Steinmetz

September 1998 **Proceedings of the sixth ACM international conference on Multimedia**

Full text available:  [pdf\(1.03 MB\)](#)

Additional Information: [full citation](#), [references](#), [citations](#), [index terms](#)

**Keywords:** copyright protection, digital watermarking for MPEG video, security and the media
